“ Akashas mom hated his existence so much that she couldn't even give him a middle name. I'll give him one and post it on everything. Don't let Angela Seay bs yall. She couldn't even give him a funeral, all she did was be a troll to his reap family. She's a sick individual.

“ I threw a bday party for him and we let balloons fly into the sky. I love him so much!!! He will have a birthday party every year. I've heard him speak, the first time it was after a session with a psychic. He says we have a soul contract and he had a mission so to speak. I'm showing his face everywhere, I'm putting him out into the world and so is my mom and brother. He will Never be forgotten. And what mother could ever be capable of such thing without postpartum psychosis? Killing the innocent is going to land her in hell. She can rot in there.

Oh and Angela is not Per dew anymore, her and my father divorced years ago and her name is Seay. She's in disguise being indecent to pretend like she cares about Akasha but Angie talks to Addison often like she's still her mom. She could have saved him, you know. So she put her guilty conscious on me but I live down in iowa with my family, my autistic son, going to school every day. If I wanted thst baby Addison wouldn't let me because her ego would never allow that. But she didn't even give him a middle name and the father Ricky is just as sick as she is. Angie and Ricky have Akashas ashes and didn't give him a funeral. She never even gave us a chance to be involved. In fact I feel that we all would be in grave danger if we did go up there. Angie is in trouble or going to be in trouble for car theft of my step dads vehicle. Angie is scum and she has no business with my family nor her obsession with my dad. Thanks alot Angie for becoming another person I strongly hate.

Honestly your family is just looking for someone to blame for what happened. Your mother lived in the same town as Addison and had her sleeping in a car. It was cold out and she was pregnant. She did this because she was afraid her husband would keep making sexual passes at her. What parent does that. Then she moved to Missouri to get away from Addison. Now as far as her sick father who was your ex lover , never stepped up to be there at all. Yea Kristen I know a lot about your parents. Addison hid the abuse from Angela. She had her thinking everything was just fine. What I don't understand is why all of a sudden do you care when you used the N word often and you were a racist. Your all sick...I feel sorry for Angela for even getting involved with craziness.
