KE

“ *My father always took us on a drive to look for fishing spots as a kid growing up. we had many adventures together.*

He would take me and my brother to watch the planes take off at the airport in the early 90's. There was never a dull moment with my father, but the one thing I loved. Was his ability to be patient with me and everyone he came in contact with. He was a beautiful soul who captivated those around him. I felt like a moth that was drawn to his flame. He would always greet me with a smile before speaking. He was a wonderful father who made choices and mistakes to learn from while staying humble through and through. i will always aspire to be more like this man!

Rest well pops
